Quest Rubric No: 1 **Team 1**

Objective criteria (0/1, 1=met)	Rating	Max	Comments
Servo spins right then left without chatter for at least three times.	1	1	
Alphanumeric display indicates time to activation	1	1	
Display shows countdown time report every second	1	1	
Walker moves forward three steps and stops	1	1	
Adjustable steps setting and step counter	1	1	
Demo delivered at scheduled time	1	1	
Investigative question response	1	1	
Total objective criteria	7	7	

Qualitative criteria	Rating	Max	
Quality of solution	5	5	
Quality of summary readme.md including use of graphics	2	3	Clean up photo captions, delete comments from template and explain on low-level software design. (maybe also include diagram)
Quality of code reporting	2	3	Code readme should include more detail of your software design and structure. Consider using branches
Quality of video presentation	2	3	Technical Video, the hardware part is well explained but add a little bit of detail on how you integrate low-level firmware concepts from the class to the project. For demo video, it's better to also navigate through which functionalities you are showing at that moment. But the length of videos is good, not too long not too short.

Total qualitative criteria	**11**	**14**

Quant Weight (75)	75	75
Qual Weight (25)	19.6	25
Total Score	94.6	100

Comments (Just suggestion, it's not the reason for point deducted)
Met all objective criteria. It's not the requirement but it's good to introduce your team at the beginning of the video. Consider using different file names. You can use code folder as ESP-IDF project; you don't have to copy your main c file from your folder to code folder.
